Navigator Object

The navigator object contains information about the browser.

Note: There is no public standard that applies to the navigator object, but all major browsers support it.

Navigator Object Properties

Property	Description
<u>appCodeName</u>	Returns the code name of the browser
<u>appName</u>	Returns the name of the browser
<u>appVersion</u>	Returns the version information of the browser
<u>cookieEnabled</u>	Determines whether cookies are enabled in the browser
<u>geolocation</u>	Returns a Geolocation object that can be used to locate the user's position
<u>language</u>	Returns the language of the browser
<u>onLine</u>	Determines whether the browser is online

<u>platform</u>	Returns for which platform the browser is compiled
<u>product</u>	Returns the engine name of the browser
<u>userAgent</u>	Returns the user-agent header sent by the browser to the server

Navigator Object Methods

Method	Description
<u>javaEnabled()</u>	Specifies whether or not the browser has Java enabled
<u>taintEnabled()</u>	Removed in JavaScript version 1.2. Specifies whether the browser has data tainting enabled
